Global Experience

Our founder brings over 25 years of international experience designing and specifying residential, commercial and healthcare facilities across India, Australia, UAE, Kuwait, Qatar, Oman , Saudi Arabia and Africa.

Having worked with and represented Global architectural product suppliers like Kohler, James Hardie, Alpolic, Herman Miller, Steelcase she brings best practices from across the world in interior and architectural product specification ,selections and design.

With this experience SpecAide was launched in UAE in the year 2018 and in India in 2021

Sample Project Experience

The founder brings experience of working on notable international projects like -

- Motherson PKC Harness, Ras Al Khaimeh **USD 230K**
- MIND, Dubai **USD 100K**
- Fakeeh University ,Dubai **USD 1.5Mn**
- Al Zahra ,Sharjah **USD 200K**
- Hamad Corporation ,Qatar **USD 3Mn**
- Al Essa ,Kuwait **USD 50K**
- NMC Hospital , Abu Dhabhi **USD 2Mn**

Companies serviced

Why Us?

Proven Track Record

- Successfully executed projects with companies across the Globe spanning Australia, Middle east and India

Quick turnaround time

- We keep stock of our imported brands of furniture and carpets .We deal in handpicked brands that are vetted for quality and service

Unique product mix

- We have curated a basket of products that allow you to differentiate your project through design and performance

Trained Installation team

- Our products are backed by our trained install team that ensure after sales service is top notch

1912

company established

12,000+

employees worldwide

800+

dealer partners around the world

1,700+

No. 1

global market

- A Fortune “World’s Most Admired Company” for thirteen years
- Multinational Finalist in the Circulars Awards – presented by World Economic Forum for circular economy leadership
- UN Global Compact participant since 2009

Steelcase is a global design and thought leader in the world of work. Along with our expansive community of brands, we design and manufacture innovative furnishings and solutions to help people do their best work in the many places where work happens.

Headquartered in Singapore, SMJ manufactures and distributes a wide range of high quality flooring solutions. It specializes in carpet tiles, broadloom carpets and luxury vinyl tiles.

With an established reputation and track record, SMJ Furnishings is arguably the largest premier flooring specialists serving the commercial and institutional sectors in Asia.

SMJ understands global flooring trends and continuously develops new designs and colours ensuring designers have a wide choice.

British Manufacturing Expertise

Since the early 1960s, Amtico has been designing and manufacturing unique luxury vinyl tiles (LVT), in their Coventry factory. Their inherent dedication to design, craftsmanship and care for the product is what the customers have always loved and what has always driven the brand, both then, now, and onwards.

The development of their designs is only part of the floor's journey. Their floors are manufactured with innovative production processes and superb quality standards – They are so meticulous with precision, all their floors have to pass 57 product assurance tests before leaving the facility!

These many years of experience are compressed into the layers of their floors. It's why their warranties are some of the longest in the industry, with cover starting from a minimum of 20 years.

Working alongside the iconic perfumers of fragrance house **dsm-firmenich**, Prolitec create ambient scent experiences that are as fresh and nuanced as those found in nature. Their team of US-based engineers develops advanced computer-controlled technologies that ensure evenly distributed, fully remote-controlled fragrance atmospheres. This allows today's busy businesses to focus on what they do best, while we help create environments where their customers can breathe easier.

They help your business's customers, tenants, guests, and employees enjoy indoor ambient scents that promote wellness, encourage relaxation, and boost energy levels when needed.

Proposed Solution for Washroom

AQ-270

The AQ270 uses Prolitec’s patented AirQ technology to diffuse fragrance and odor canceling products into the air. This appliance was designed as an odor canceling solution for high-traffic, smaller spaces, has a slim, discrete profile, and is available in a wall mount or free standing configuration.

- **Area Covered by one Unit: 200-300 Sqft**
- **Monthly Rental: Rs 4556.25 per unit including regular fragrance**
- **Lead Time: 1 week from PO**

Solution For cafeteria

AQ590

The AQ590 provides intuitive controls and powerful performance wrapped in a sleek, user-friendly design. Equipped with a digital display and 50 adjustable intensity levels, the AQ590 allows users to personalize scent distribution to match the exact needs of their space. Designed to scent areas up to 30,000 cubic feet, the AQ590 effectively covers vast lobbies, retail stores, and other expansive environments.

- **Area Covered by one Unit:700-1000 Sqft**
- **Monthly Rental: Rs 5300 per unit including fragrance**
- **Lead Time: 1 week from PO**

Proposed solution for Reception/Boardrooms

AirQ 890

Aesthetic Appeal,Ease of Use
ScenXus Compatibility: Ensuring a wide variety of scent options andcustomization.
Stability & Security
Long-Lasting Performance:.
Eco-Friendly: The AQ2500 cartridge, like all Prolitec cartridges, is made from recyclable plastics, aligning with sustainability goals.
Optimized Output: The combination of the 590 pump and high-volume fan ensures optimal scent dispersion.

- **Area Covered by one Unit:2000-2500 Sqft**
- **Monthly Rental: Rs 14700per unit including fragrance**
- **Lead Time: 6 weeks**

Switchable Glass Solution

PDLC Smart Film, also known as Polymer Dispersed Liquid Crystal Smart Film, represents a fusion of advanced materials science and engineering ingenuity. Its unique composition enables PDLC Smart Film to switch between transparent and opaque states with the application of an electrical current.

How Does PDLC Smart Film Work?

PDLC Smart Film operates on the principle of electrically induced transparency. When an electrical current is applied to the film through transparent conductive coatings, the liquid crystal molecules within the film align in a parallel orientation, allowing light to pass through and creating a transparent appearance. This state is known as the "on" or transparent state.

Conversely, when the electrical current is turned off, the liquid crystal molecules revert to a random orientation, scattering light and creating an opaque appearance. This state is known as the "off" or opaque state. By controlling the application of electrical current, PDLC Smart Film can be switched between transparent and opaque states, providing instant privacy and light control.

Switchable Glass

Switchable Glass

Nano Film install Video(Click)

Celaeno™ Nano Cloaking Film is made by NHDFilm. It is an LED cloaking technology for glass walls that obscures content on LED screens from outside view. It's a high transparent film material with back adhesion which can be easily pasted on the glass. Anyone looking into the room from the outside sees just a black screen, while everyone in the room can work freely with peace of mind.

Switchable privacy films for existing glass

Your existing glass can now be converted to a switchable privacy glass with our switchable self-adhesive films. These films have the same switchable properties as our laminated privacy glass and can be easily installed by our expert team.

Benefits

Save costs on costly glass replacements

Privetek® switchable films can be easily installed on existing glass surfaces saving you expensive glass replacement costs.

Get rid of unhygienic blinds

The Vertical or horizontal blinds typically found in offices are not only difficult to clean but are also breeding grounds for bacteria, dust, and grime. Privetek switchable films allow you to have complete privacy without compromising on your aesthetics or cleanliness.

Superior clarity, exceptional performance, easy maintenance

Low iron, premium float glass and premium, German made, Hybrid EVA for greater clarity and stability. With the world's most advanced Polymer Dispersed Liquid Crystal (PDLC) for reliable, consistent performance.

Finest manufacturer & finish

All glass are processed and finished in-house using the latest machines and furnaces. Assembled in a climate-controlled, clean room environment. All glass tempered and polished as standard. Precision packed for global shipping.

Reliable, consistent operation

Every unit is subjected to a rigorous set of quality checks including extensive, automated, electrical tests to ensure reliable, consistent operation. Our advanced electrical controllers deliver the highest level of clarity and provide for several fail safes that can automatically shut down and protect the product, prolonging product lifespan.

Exceptional UV block

Privetek® smart glass provides up to 99.5% protection from damaging UV rays.

Longer life

Our raw materials, processing, finishing, testing and electrical controllers provide a higher quality, more stable, longer lasting product – the reason we can offer our comprehensive 5-year warranty.

Decision making considerations

Cloaking Films

The most important step in considering Blocking film for your project is making sure that it is with your displays and if so, in what orientation the film will need to be installed.

Supported Display Screens
 LED Backlight Liquid Crystal Display(Majority)

Not Supported Display Screens
 Surface Hubs and Collaborative Touch Screen Devices;
 OLED displays, Laptops, Tablets, Smart Phones;
 Projection Displays, Displays Mounted Behind Glass;
 Plasma Displays, Passive 3D Displays, CRT Displays;

2, CONSIDER

When considering Nano Cloaking film for your space, there are a few things to keep in mind;
 Cloaking film can change opacity depending on the viewing angle; it will not be fully opaque in all circumstances. The worst case scenarios are when the viewer is very close to the glass and viewing at an extreme angle.
 To test, place the sample in several locations on the glass and note the appearance of Cloaking film.

Rate: Rs2370/sqft
 Lead time 15-20 days

Retrofit Smart Films

- Externally applied on glass surface.
- Film exposed to external conditions like humidity.
- Chances of delamination and damage due to several reasons like equipment movement, cleaning methods.
- The electrical contacts on the film are exposed to humidity / condensation.
- Non washable. Only for dry areas as surface and electrical contacts are exposed.
- Shorter life span and limited 2 years warranty.

Rate:3300/ sqft accessories freight extra
 Lead time 15-20 days

Vs Privacy Smart Glass

- Laminated between two glasses.
- Completely air tight as film is fully sealed within glass.
- No chance of any damage to the pdlc interlayer.
- The electrical contacts on the pdlc are fully secured between two glasses.
- Waterproof. Glass surface can be cleaned using conventional cleaners or water.
- Longer life span and 5 years warranty on film performance and 10 years warranty against delamination of glass.

3850/sqft (accessories freight extra)
 Lead time 21-30 days
